

5 Metre Pagoda - Pagodas have the frames internally- These units can be added together to make larger structures in many configurations, they can be supplied open or with walls that have “windows” or solid. Very sturdy and can withstand up to 80 mph winds when staked to the ground.

The interior open space can have wooden floors, carpets or just Rolatrax, Mobex can also supply furniture Nimloc display panels, AV equipment & literature holders. Low level seating with a real hospitality feel can also be provided, or even set up with tables and chairs for a dinner or wedding or birthday party.

Features

Mobex gazebos feature the best of Italian design and style which combine in structures that are eye catching, versatile and substantial.

Each unit is 5m x 5m and they can be linked.

Walls are on tracks so can be opened and closed easily.

Good internal height and access up to 2.4 metres allow them to be fitted with floors, walls and furniture to create quality exhibition stands in outdoor locations.

Light and airy with no flapping canvas

Flagpoles are optional but add that extra dimension.

Benefits

Easy accessible no steps ideal focus for passers by
